Sustainability in focus

We select materials and develop designs with sustainability, disassembly, and recirculation in mind.

In all of our products, we use FSC®-certified wood - the mark of responsible forestry.

Detachable covers

All our products have detachable covers for easy maintenance.

Our fabrics are all made from or partly made from recycled materials.

All our fabrics and foam are OEKO-TEX® certified. OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances to ensure customer confidence and high product safety.

We offer a 10-year warranty on our frames, as we want to make sure that all our products have a prolonged lifespan.

Optimized for transport

Our designs and packaging are optimized to ensure minimized CO₂ emissions in relation to transport and storage.

Introduction

As consumers, we are all obligated to reevaluate our consumption habits. Our collective willingness to prioritize the purchase of products that we want to keep over time is crucial, as it is the most effective way to minimize resource consumption and pollution.

As a supplier of upholstered furniture, we are obligated to design and develop products with a long-life cycle in mind. At the same time, materials must be selected and designs developed with sustainability, disassembly, and recirculation in mind.

Rund is designed to honor the above principles without compromising functionality, comfort, quality, or aesthetics.

Rund is a masterpiece of comfort and sustainability that doesn't compromise on style or uniqueness. A modular sofa created to adapt to any style or reference, Rund offers a perfect blend of aesthetic appeal and functionality.

Rund is a comfortable and practical sofa equipped with removable, washable covers. The design also makes it possible to easily replace individual parts in case they are damaged, or you just want to change the look by replacing the color of the cover or choice of fabric. This is an essential part of the design as it prolongs longevity of the sofa - in the interest of your economy and consumption of resources.

Rund's character is defined by the distinctive and comfortable rounded arm and back. The flexible, modular design will allow you to shape the sofa to your living room, your needs and seating preferences.

Rund has been designed to be comfortable without the use of cushions, but to be able to adjust the sitting comfort and adapt it to a given situation and body structure, we offer a variety of cushions to form the preferred support.

Give back to Nature

In addition to using FSC®-certified wood, we contribute to the balance of the global ecosystem by planting more than 10.000 trees every year to compensate for our consumption of wood.
